

RainMiser™

Congratulations on choosing **RainMiser™**, the World's most advanced rain barrel optimizer.

RainMiser™ is clearly the best choice for environmentally responsible consumers.

Please check the shipping box and confirm that all the parts are included.

Use Your
Rain Barrel
(Plastic or Steel)

Always be safe

Use a solid, sturdy footing if you elevate the rain barrel above the ground

Safety Warnings & Considerations

- When filled with water, a 55 gal. (208 L) drum will weigh close to 500 Lb (230 Kg)
- Confirm that any supporting structure or footing can safely carry a minimum load of 2200 Lb (1000 Kg)

Easy Fill Funnel

2 piece
body

Support
Bracket

Clear
Vinyl
Hose

Dual
Distributor
Valve

Second top opening
for rain water inlet

Installation Instructions

- Position the rain barrel under a down pipe from the roof rain gutter.
- **Always be safe. Ask for help when handling large bulky objects.**
- Slide the **RainMiser™** support bracket onto the top half of the **RainMiser™** body assembly.
- Connect both halves of the **RainMiser™** body assembly. Use a thread sealant and lubricant, like Vaseline®, then firmly hand tighten.
- Insert **RainMiser™** and support bracket into the 2" bung hole in the barrel. Position it over the edge of the barrel as illustrated above.
- Connect the clear vinyl delivery hose onto the **RainMiser™** assembly. Attach the distributor valve to the bottom hose end.
- From the roof gutter down pipe, channel rain water into the second top bung hole in your rain barrel. A funnel with a screen works best.

Operating Instructions

The rain barrel should be filled to a minimum of ¼ of its capacity for the initial startup.

- Open the top **RED** ball valve on your **RainMiser™** and close both **BLACK** ball valves in the **Dual Distributor Valve** at the bottom of the clear vinyl hose.
- Pre-charge your **RAINMISER™** with water using a watering can and the easy fill funnel. It should hold approximately 8 oz. (236 ml) on initial start up.
- Tap your **RainMiser™** to insure that all the air is out. Confirm that water fills the clear vinyl hose, and water remains in the easy fill funnel after tapping.
- **CLOSE** the top **RED** ball valve. Your **RainMiser™** is now fully charged and ready for use.
- Both **BLACK** ball valves in the **Dual Distributor Valve** can be used to meter out and control the rate at which your rain barrel will drain.
- When your rain barrel is drained, the clear vinyl hose will be empty. Repeat this step by step start up procedure. Note: Draining will stop whenever the **RED** ball valve is reopened.

RainMiser™

Water is too precious to waste

The top left photo shows a typical set-up for a plastic rain barrel used to supplement household garden watering. The down pipe from the roof rain gutter discharges into a funnel that is inserted into one of the two top openings in the barrel. The **RainMiser™** assembly is inserted into second barrel opening

When pre-charging your **RainMiser™** with water, an air lock may slow the filling of the clear vinyl hose. To overcome this condition we have included a long **red** tube. The following steps outline the filling procedure.

RainMiser™ Filling Procedure

1. Your **RainMiser™** was shipped with a long **red** tube inside the shipping box.
2. With the **Red** ball valve open, and the two **Black** ball valves in the distributor valve closed, the **red** tube is inserted into the Easy Fill Funnel.
3. The **red** tube is lowered down into the **Rain-Miser™** assembly until it is just visible at the top end of the clear vinyl hose.
4. Holding the **red** tube with one hand, a small watering can or measuring cup, is used to pour water into the Easy Fill Funnel on your **RainMiser™**.
5. Your **RainMiser™** is fully pre-charged, when water fills the clear vinyl hose and remains in the Easy Fill Funnel. Remove the **red** tube.
6. With water still visible in the Easy Fill Funnel, fully close the **Red** ball valve.
7. Your **RainMiser™** is now ready to use.

Order Your **RainMiser™** Today

What makes **RainMiser™** the best “rain barrel optimizer” in the world?

Today, rainwater harvesting in urban areas is providing supplemental water for countless household gardens. There is no secret to collecting rainwater, put a barrel under a down pipe from your roof gutter, and gravity does the rest. The trick is starting and stopping the flow anytime you want, and controlling the flow rate that best meets your gardening needs. Hundreds of commercial rain barrels are available that do just that, and some retailers even offer “free shipping” if you live close enough. Live outside the “free zone”, and the shipping charges for a 55 gallon rain barrel can cost more than the rain barrel itself.

RainMiser™ is the only logical answer

Every day, thousands upon thousands of 55 gallon plastic barrels, filled with hundreds of different commodities are shipped throughout North America, and throughout every country in the world. The cost of shipping empty barrels back to the supplier, plus government regulations on reuse, means that used plastic barrels can be found almost everywhere.

RainMiser™, is the perfect answer for recycling a used plastic barrel. Without any modifications, that used barrel becomes an instant rain barrel. **RainMiser™** is made entirely from non-metallic, non-corrosive components approved for domestic water service. **RainMiser™**, weighing only 2½ lb., (1.15 kg), can be shipped almost anywhere by general parcel postal service.

RainMiser™ is shipped direct from the factory in Richmond, BC Canada.

RainMiser™ sells for \$69.50 each USD or CDN plus shipping, \$15.00 anywhere in Canada, \$18.00 anywhere in the continental USA. Postal rate will be reduced on orders for multiple units. Allow 3 weeks for delivery.

Order your **RainMiser™** today. Send your cheque made payable to: **RainMiser International**
Mail to: Sanctuary Creative Works, 10 Mill Street West, Hillsdale, Ontario, Canada L0L 1V0

Or pay by **VISA** credit card in \$USD on telephone orders. Toll Free (Canada & USA): 1-888-736-8645
On orders by e-mail, or by Fax to (604) -521-1244 please provide your telephone number and contact.
You will be contacted by telephone for **VISA** credit card details and to confirm your order.
